

TESSERENT EXERCISES OPTION TO ACQUIRE DIRECT RELATIONSHIP WITH 60 CUSTOMERS

Tesserent Limited (**ASX: TNT, Tesserent, the Company**) is pleased to advise that it has acquired 60 customers via the execution of an option with its UK-based firewall wholesale partner RedScan.

By exercising the long-standing option Tesserent will now maintain a direct relationship with the customers, who purchased Tesserent's managed firewall offering via RedScan.

In addition to allowing Tesserent to achieve a greater margin on sales to these customers, it provides a significant opportunity to cross sell additional products and services from the company's Cyber 360 portfolio.

TESSERENT MANAGING DIRECTOR, JULIAN CHALLINGSWORTH, COMMENTED:

"Whilst we have always seen the strategic value in dealing directly with customers to achieve the best outcomes, we've not previously been in a position to exercise this option.

"We're looking forward to now developing closer working relationships with these customers to find the very best cybersecurity outcomes for them across the board."

ABOUT TESSERENT

Tesserent provides full service, enterprise-grade cybersecurity and networking solutions targeted at mid-market customers in Australia, and internationally in the UK and Korea. The company's Cyber 360 strategy delivers integrated solutions covering identification, protection and monitoring against cybersecurity threats.

Tesserent has been transformed via the acquisition of several high-quality cybersecurity businesses including Pure Security (Hack Labs, Pure Hacking, Certitude & Securus Global), Rivium and north (to be completed), making it Australia's largest listed dedicated cybersecurity firm.
