

ASX ANNOUNCEMENT | TESSERENT LIMITED

MELBOURNE – MONDAY 10TH JULY 2017

CYBERBIZ UPDATE

STRONG FEEDBACK FOLLOWING MARKET LAUNCH OF CYBERBIZ

- Last week, Tesseract launched CyberBIZ via our direct and indirect sales channels.
- CyberBIZ orders have already been received and are being processed.
- Tesseract would like to clarify that the MoU referenced in the market release on 28th June 2017 was signed by Mook Investments Pty Limited, trading as Telstra Business Centre Homebush. CyberBIZ is a proprietary Tesseract product not owned or endorsed by Telstra.
- CyberBIZ has gained attention from the telco market as well as other potential new channel partners in business verticals including: financial services, internet service providers and IT managed services.

ABOUT CYBERBIZ – SECURITY MADE EASY FOR SMBs

CyberBIZ enables small and medium businesses to have the same level of cyber security as large organisations. While there are many cyber security offerings available to SMBs, most require the business owner to install and manage the equipment themselves. CyberBIZ stands apart from other SMB products by offering a comprehensive suite of managed cyber security services, including security culture and training. A managed service means that Tesseract monitors and protects our customer's network from our Security Operations Centre in Melbourne, leaving our customers to focus on growing their business while we look after their network security. Security culture ensures staff are 'cyber savvy', with specialised training to help them make smart choices online and reduce the risk profile of their network.

About Tesseract

Tesseract is a specialist in managed cyber security. Tesseract manages direct end-customers in Australia while also offering a managed security service to wholesale channel partners globally, enabling them to deliver effective cyber-security management to their end-customers.
